

Alpha Real Capital

“ HG Technology spent time understanding how Alpha Real operates before suggesting a SharePoint structure. Alpha Real Capital now have a user-friendly cloud-based document management system with an efficient security model in place. The delivery of our SharePoint site was done in a timely manner and caused little to no disruption to our day-to-day working. ”

Name, Job Role

Alpha Real Capital is a London based asset investment manager, operating since 2005. Alpha Real Capital specialise in Property Lending, Social Real Estate, Long Income Real Estate and currently have £4.5 billion AUM.

Alpha Real Capital approached HG Technology with the vision to move all documents and data from their previous file server-based management system to a more efficient cloud-based system. We put our previous experience to good use to help guide and provide a smooth transition with improved benefits.

Security and permissions were key variables for Alpha Real Capital, and therefore we designed a structure that mirrored Alpha Real Capital's departments to ensure that we could meet their criteria, as well as for ease of use. Once the structure was agreed upon and implemented, we used the appropriate transfer tools to migrate Alpha Real Capital's 3 million documents. This was done department by department, outside of office hours, to ensure all users could work as usual.
